

KHAIZURAN MALVIN

Full Stack Developer — Laravel & React.js

Yogyakarta, Indonesia | khaizuranmalvin09@gmail.com | 082229583175 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full stack developer specializing in Laravel and React.js, currently a Software Developer student at SMK IDN Boarding School. Experienced building and shipping real-world web and mobile applications end to end — from backend APIs to responsive frontends. Has taught Machine Learning and Generative AI implementation as a Technical Instructor at three universities, developing strong technical communication and problem-solving skills beyond the classroom. Available for internship or full-time front-end / full stack developer roles.

SKILLS

Frontend: JavaScript/TypeScript, React.js, Tailwind CSS, HTML5 & CSS3

Backend: Laravel Framework, PHP 8 & OOP, REST API Design, Authentication

Database & Tools: MySQL, Git & GitHub, Firebase

Mobile Development: Flutter, Dart, State Management

Engineering Practices: Problem solving, modular code, testing mindset, issue investigation, code maintenance

PROJECTS

Web Takaful — Sharia insurance platform for claim digitalization

- Digitized manual claim processing workflow, improving overall performance by 50%.
- Stack: Laravel, React, MySQL.

Web Masjid — Mosque financial transparency & prayer schedule platform

- Built real-time financial transparency reporting and online prayer schedule management.
- Stack: React.js, Bootstrap, PHP.

Web Absensi — Geolocation-based attendance system

- Implemented geofencing technology to prevent attendance fraud, reducing cheating by 90%.
- Stack: Laravel, React, Geolocation API.

Attendance App — Mobile attendance app with face detection

- Built face recognition and selfie verification with real-time sync via Firebase.
- Stack: Flutter, Firebase, Dart.

QR Scanner App — QR/barcode scanner for attendance and event ticket validation

- Supported multi-format QR & barcode scanning with history log and instant results.
- Stack: Flutter, Dart, Camera API.

News App — Mobile news app with bookmark & push notification

- Implemented REST API integration with infinite scroll, bookmarking, and push notifications.
- Stack: Flutter, Dart, REST API.

EXPERIENCE

Technical Instructor — Machine Learning — Universitas Amikom Yogyakarta

- Delivered fundamental Machine Learning training and taught data processing algorithm implementation.
- Guided students through the data science workflow, from data collection to model deployment.

Guest Speaker — AI for Business — Universitas Diponegoro Semarang

- Led a workshop on AI implementation strategy for improving business operational efficiency.
- Presented AI business automation case studies to university-level participants.

Technical Instructor — AI Implementation — Universitas Ahmad Dahlan

- Taught practical use of Generative AI to improve software development productivity.
- Ran hands-on sessions integrating AI tools into professional developer workflows.

Participant — GDG DevFest Surabaya 2024 — Hotel Swiss-Belinn & ISTTS, 2024

- Studied Cloud AI and the latest Google Cloud technology for application scalability.
- Explored integration of cloud-based AI models into modern web infrastructure.

CERTIFICATES & COURSES

- Belajar Dasar AI — Dicoding Indonesia (valid through 2028)
- Future Builders Workshop — AI & ML — GDG on Campus ISTTS
- Full Stack Laravel 12 & Vue 3 Developer — BuildWithAngga
- Pemrograman Dart Dasar — ID-Networkers (IDN.ID)

EDUCATION

Software Developer Program — SMK IDN Boarding School *Currently in Grade 12 (Class of 3)*

LANGUAGES

Indonesian: Native
English: Professional working proficiency

AVAILABILITY

Available for internship or full-time roles as Front-End Developer, Full Stack Developer, or Software Developer in Yogyakarta and nearby areas.
